Who We Are

- Flood Risk Canada (FRC) is a proactive Flood Risk Management Company specializing in thorough evaluation and reporting of flood risks throughout Canada and the United States.
- We are experienced flood mapping professionals, built from a team of local and national experts in the field of Flood Services.
- Our resume includes over 50 years of professional combined experience in Flood Risk Assessment and Flood Risk Management.

Flood Assessment

- Comprehensive Analysis of any tracks throughout North America.
- Identifies exact locations of track areas for potential derailment and environmental disasters
- Flood Plain Modeling is presented in a 100-Year Flood Zone Simulation showing where fragile rail lines are located
- Reviews the track and identifies low points of elevations that will flood in a 100 year storm
- Dependable recommendations for specific situations

FLOOD RISK CANADA
Proactive Flood Prevention Solutions

This Happens

In 2015, a freight train derailed in Texas and overturned due to floodwaters.

Our Solution

24/7 Flood Watch and Forecasting Program

- These proactive programs offer national and regional weather alerts and flood monitoring in real-time
- Your team of drivers will receive flood warnings of areas of track that are at risk of flooding
- These critical and calculated alerts will allow you to avoid catastrophic results
- FRC's data and direction will strengthen your safety standards
