Rhomberg Sersa Rail Canada Has Been Awarded The CARS 2022 Innovation Award

[Ottawa, November 24th, 2022]. The Canadian Association of Railway Suppliers (CARS) has named Rhomberg Sersa Rail Canada as one of the winners of the 2022 Innovation Awards. This award is for members that have developed advanced or innovative technologies to meet the needs of the rail industry.

“We worked with LINSINGER to build a specifically adapted rail-bound “SF02T-FS” milling train specifically to suit Canadian requirements. We are proud to be the first company to introduce this innovative rail milling technology, not only to Canada but to the entire North American market. Our first milling unit landed in Toronto in the late months of 2018 and Rhomberg Sersa has not stopped milling since then on metro, LRT and commuter lines throughout Canada.” - Michael Match, CEO, Rhomberg Sersa North America Inc.

“We were thrilled when we received nominations for Rhomberg Sersa to receive the innovation award. They have been recognized by the Railway Supplier community for their innovative work and we are happy to reinforce this recognition.” – Sylvia Newell, President, CARS.

By introducing the milling technology to the Canadian market, Rhomberg Sersa has set a new standard for corrective and preventive rail maintenance with this innovative milling technology. By applying rail milling as an integrated maintenance concept, it is possible to significantly extend life of the asset rail by eliminating RCF, corrugation and other rail flaws, while at the same time reducing costs.

About Rhomberg Sersa Rail Canada

Rhomberg Sersa Rail Canada is a self-sufficient and integrated member of the Rhomberg Sersa Rail Group with highly experienced local staff. Our key people in Project Management and Supervision have 20 and more years’ experience in all disciplines of track construction, maintenance and rail systems delivery in Canada.

The Rhomberg Sersa Rail Group is one of the worlds largest rail maintenance and construction providers and is recognised as an accredited specialist for rail systems technology, rail construction infrastructure and rail equipment. Rhomberg Sersa Rail Group is acknowledged and sought after as the leading provider of innovative and cost-effective 'whole of life' solutions for the construction and long-term management of all types of conventional ballasted and high-speed slab track systems and associated electro-mechanical installations.

Rhomberg Sersa Rail Canada, with its base in Brockville, Ontario is the operating division of the Austrian/Swiss-based Rhomberg Sersa Rail Group.

About The Canadian Association of Railway Suppliers

The Canadian Association of Railway Suppliers (CARS) has been around for many years but incorporated in its current form in 1991, representing companies selling products and services to railways and transits domestically and internationally. CARS represents over 155 companies that are important to the operations of the railways and transit authorities.
